

Kombi Pellets

Basic and Leisure Feed

Feed supplement for horses and ponies

Moderate energy, little protein, high levels of vitamins and a very favourable calcium/phosphorus balance make this pelleted mixed feed a really practical, high-value feed, and an ideal addition to a diet based on oats and hay. By feeding a combination of oats and Combi Pellets, your horse will get all the benefits of oats, and at the same time, it will get all the important vitamins, minerals and trace elements which it cannot get from oats alone. Due to their exceptional compatibility and palatability, Combi Pellets are well suited for use in horses of all breeds and levels of work.

The benefits at a glance:

- optimal addition to an oat & hay based diet
- high levels of vitamins & trace elements
- balanced calcium / phosphorus ratio
- protein reduced
- oat-free

Recommended feeding:

Feeding recommendation:

light to moderate work: approx. 200 g - 400 g per 100 kg body weight per day

With smaller quantities, we recommend adding a mineral supplement.
For horses with tooth problems, hasty eaters or old horses, pelleted food should be soaked, if necessary.
