

## EMH Cool Müsli

### Basic and Leisure Feed

### Complementary feed for horses and ponies

EMH Cool Muesli is an oat-free and tasty muesli, based on hydrothermally treated cereals. The basis for the composition of this mix was the desire of many horse owners to enjoy leisure activities with an even-tempered and calm but high-performing horse as their partner. The oat-free composition contains all important nutrients to meet your horse's daily nutritional requirements with only small quantities of concentrate feed. Thanks to the reduced protein and energy content, the digestion is eased; it is recommended for horses and ponies in light work, or at rest, as a complete feed, or in addition to cereals. The supplementation with EMH actively supports and eases the digestive function. With continuous use, EMH Cool Muesli can harmonise all metabolic processes. EMH Cool Muesli, with its fine balance of nutrients and active ingredients, as well as the added magnesium, therefore ensures the horse's vitality while keeping a "cool" head.

The benefits at a glance:

- oat-free, as well as protein & energy reduced
- with added magnesium for a "cool head"
- high levels of zinc, copper & selenium
- full range of all important vitamins & minerals
- high digestibility with added EMH
