

## EMH High Energy

### Sports and Performance Feed

### Feed supplement for horses and ponies

EMH® High Energy Muesli is an energy-rich special mix designed for the highest performance demands in training and competition. With higher levels of the amino acids lysine and methionine. These high-quality essential amino acids provide the ideal basis for muscle growth, a supple and strong muscular system, and ensure rapid recovery of muscles after exercise. EMH® High Energy Muesli provides your horse with a highly digestible source of energy. It contains cold pressed milk thistle oil and hydrothermally treated barley and maize flakes, as well as (popped) grains, expanded in a special process. Due to the high level of expansion and the addition of EMH®, the contained starch is quickly absorbed in the small intestine and provides a quickly available source of energy. It is rich in Omega-3 fatty acids to strengthen the immune system. The addition of vitamins, trace elements and minerals has been specifically tailored to the needs of very hard working horses. Feeding other additional products becomes unnecessary. The addition of the EMH® increases overall positive effect on the body and promotes vitality in your horse while maintaining a balanced temperament.

The benefits at a glance:

- for high-performance horses
- rapid energy and nutrient supply
- with essential amino acids for the support of a strong muscular system
- highly digestible with expanded and hydrothermally treated grains
- rich in omega-3 fatty acids
