

EMH Herbs Muesli

Basic and Leisure Feed

Feed supplement for horses and ponies

EMH is an extract from highly effective herbs, fermented by micro-organisms, which naturally supports the metabolic processes and strengthens the immune system. With the fermentation process, the natural active substances of these herbs are more accessible for the horse and, therefore, more effective than the same herbs in dried form.

EMH Herb Muesli is a very useful feed addition for horses with a tendency to suffer from respiratory problems, but also dust sensitive, nervous, or appetiteless horses will enjoy EMH Herb Muesli as a tasty and aromatic addition to their feed. These days, one knows all about the strengthening and revitalising properties and the holistic influence of herbs on the body. EMH Herb Muesli uniquely combines natural, valuable, aromatic herbs with an easily digestible, oat-free muesli, and brings the healing power of nature directly to your horse's daily feed. With the addition of EMH, the nutritional and active components of the feed are made more accessible, which will optimise the overall conversion of the feed. With a balanced intestinal flora, the foundation is laid for an intact and efficient immune system. Thus, EMH Herb Muesli contributes effectively to the continued well-being of your horse at all levels of work.

The benefits at a glance:

- increased accessibility of substances with the addition of fermented herbs
- as support for respiratory problems
- high levels of vitamins & trace elements
- suitable for dust-sensitive, nervous & appetiteless horses
- optimal supply of nutrients
