

Fruit Muesli

Basic and Leisure Feed

Feed supplement for horses and ponies

Due to the high level of selected dried fruit pomace, it is especially tasty and therefore exceptionally suitable for feeding picky horses. Carrots and beetroot supply the organism with valuable natural minerals and trace elements as well as vitamins; they stimulate the general immune defence and have an appetising effect. Apple pomace and alfalfa promote the digestion and help to prevent imbalances in the microbiom of the gut flora. The balanced and varied ingredients ensure a slow feed intake and, therefore, an optimised adsorption of nutrients. The composition of the carbohydrate structure, which is especially selected to fulfil the specific digestive requirements of horses, ensures a consistent utilisation of the available energy and nutrients. Frucht Müsli (Fruit Muesli) is designed for all ponies and horses in light to moderate work, which should have an oat-free but balanced and natural diet.

The benefits at a glance:

- extremely low in protein
- high levels of selected fruit pomaces
- particularly tasty, therefore very suitable for fussy eaters
- with valuable, natural minerals, trace elements and vitamins
- ideal for all leisure and robust horses
