

Osteomin Leckmasse

Mineral Supplements

Mineral supplement for horses

This tasty and homogenous lick is weatherproof and, therefore, thoroughly suitable for outdoor use. Calcium and phosphorus play an important part for the stability and the functions of the skeleton. The low levels of sodium in other feeds are balanced by the sodium present in the lick. Many important trace elements are present in sufficient quantities to cover central control functions of metabolic processes.

Composition: 21,1 % Calcium sodium phosphate, 18,9 % Monocalcium phosphate, 15,4 % Sodium chloride, 14,2 % Apple molasses, 10,6 % Calcium magnesium carbonate, 4,8 % Wheat semolina, 3,5 % Apple pomace, 2,3 % Magnesium oxide

Analytical constituents and levels: 8,00 % Phosphorus, 12,00 % Calcium, 2,00 % Magnesium, 7,00 % Sodium

Additives per kg: 1.350,00 mg Zinc oxide (3b603) ^{NA}, 1.000,00 mg Manganese (3b502) (manganese (II) oxide) ^{NA}, 1.250,00 mg Iron (3b103) (iron (II) sulphate, monohydrate) ^{NA}, 525,00 mg Copper (3b405) (copper (II) sulphate, pentahydrate) ^{NA}, 25,00 mg Calcium iodate, anhydrous (3b202) ^{NA}, 8,00 g L-lysine monohydrochloride, techn. pure (3c322) ^{NA}, 4,00 g DL-methionine, techn. pure (3c301) ^{NA}, 5,00 mg Cobalt (3b304) (Coated cobalt (II) carbonate granules) ^{NA}, 10,00 mg Selenium (3b802) (coated sodium selenite granules) ^{NA}

NA = Nutritional additives
ZA = Zootechnical additives
TA = Technological additives
SA = Sensory additives
